

THE PROCUREMENT PLACE

# COMPANY PROFILE

[www.widenspro.com](http://www.widenspro.com)

**WidelensPRO is designed to save time and money for businesses by automating the procurement process. They offer an efficient way to manage the entire procurement cycle from supplier selection to final payment. WidelensPRO provide access to a wide range of suppliers and products, making it easy to compare prices and quality. One of the key benefits of a WidelensPRO is transparency. The website provides complete information about suppliers, their products, and prices, which makes it easy for businesses to compare and evaluate suppliers. This transparency ensures that businesses get the best value for their money**

# KEY SERVICES

---

- **Support in sourcing**
- **Requirement Development**
- **Supplier Identification & On Boarding**
- **Managed Sourcing Process**
- **Contract Award & SOW**
- **Commercial Management**

# OUR MISSION

## Mission

We believe in saving time and money. Our services will be in - food industry, construction industry , steel building construction , tiles manufacturing industry .

01

## Vision

Our vision is to provide complete satisfaction to our clients .

02

## Value

We value for client's time and money.

03

# **INDIRECT MATERIAL SOURCING**

---

**Indirect Material Sourcing:-** Indirect material sourcing refers to the procurement of goods and services that are not directly incorporated into the final product or service of a company. These items are required for the functioning of the company's operations and may include office supplies, maintenance and repair parts, and utilities. The process of indirect material sourcing involves identifying suppliers, negotiating prices, and managing inventory levels to ensure that the required materials are available when needed. Effective management of indirect material sourcing can help to reduce costs, increase efficiency, and ensure that the company has the necessary resources to operate smoothly.

## **FOCUSED AREA**

---

- **FOOD INDUSTRY**
- **CONSTRUCTION INDUSTRY**
- **STEEL BUILDING CONSTRUCTION**
- **TILES MANUFACTURING INDUSTRY**

# FOOD INDUSTRY

---

The food industry sourcing refers to the process of procuring and acquiring raw materials, ingredients, and products from suppliers to produce food products. It is a critical component of the food industry as it affects the quality, availability, and price of food products. The food industry sourcing can be done locally, nationally or internationally depending on the availability of ingredients and suppliers. It is essential for food companies to ensure that their sourcing practices are ethical, sustainable and comply with regulatory requirements to maintain consumer trust and meet market demands.

# CONSTRUCTION INDUSTRY

The construction industry sourcing involves the process of finding and selecting the best suppliers, contractors, and materials to meet the requirements of a construction project. Sourcing can involve various factors such as cost, quality, availability, and lead time. Construction companies must ensure that their sourcing strategies are effective to ensure that the project is completed on time, within budget, and to the required standards. Effective sourcing can also help to build strong relationships with suppliers and contractors, which can result in more successful projects in the future.

# PRECAST INDUSTRY

The precast industry refers to the manufacturing of precast concrete products such as walls, columns, beams, and slabs. Sourcing for the precast industry involves finding and selecting suppliers who can provide the necessary raw materials, equipment, and services required for the production of precast products. This may include sourcing for concrete mix, reinforcement, molds, formwork, lifting equipment, and other tools and machinery. To ensure quality and efficiency in the precast production process, it is important to work with reputable suppliers who can provide high-quality materials and equipment, reliable delivery, and excellent customer service.

# STEEL BUILDING INDUSTRY

A worker wearing an orange hard hat, blue overalls, and grey gloves is holding a large roll of corrugated metal in a steel mill. The background shows shelves filled with stacks of metal pipes and other industrial equipment.

Steel building construction sourcing refers to the process of acquiring materials, equipment, and labor necessary for the construction of a steel building. It involves identifying reliable and cost-effective suppliers of steel, fasteners, insulation, roofing, and other components required for the project. Sourcing also includes finding skilled and experienced contractors, engineers, architects, and project managers who can design and build the structure to meet the client's needs and specifications. Effective sourcing can help reduce construction costs, shorten project timelines, and ensure quality control throughout the building process.

# TILES INDUSTRY

---

The tiles manufacturing industry sources raw materials such as clay, ceramic, stone, and other materials from various suppliers. These materials are then processed and manufactured into various shapes, sizes, and finishes, which are then sold to distributors and retailers. The sourcing of these raw materials is crucial to the quality of the tiles produced and the profitability of the industry. The industry also sources equipment and machinery from suppliers to aid in the manufacturing process. In addition, the industry relies on a skilled workforce for the manufacturing process, and thus sources labor from the local community or through international recruitment. Overall, sourcing is a critical aspect of the tiles manufacturing industry and can impact the quality, cost, and availability of the final product.
